Jozani Forest Tour

In the south of the island, Jozani Forest is a wonder and delight, with medicinal cures and stunning scenery. Currently under consideration to become Zanzibar's second World Heritage Site, the Jozani- Chwaka Bay area is a hotspot of biodiversity. The forest is home to a number of endemic species, including the Zanzibar Red Colobus Monkey.

Your guide will take you on a nature trail, lined with eucalyptus and mahogany trees and explain the medicinal properties of various plants and tell you about the animals, birds and reptiles that make their home in the various habitats of this tropical rainforest.

Troops of Zanzibar Red Colobus monkeys can be found scrambling from branch to branch, in search of food. The monkeys have become acclimatised to people and allow you to get close to them to take photographs as they eat, play and jumping from the treetops.

The mangrove boardwalk takes you above the swamp, where, depending on the tide, you can see tropical fish flitting between the mangrove roots and crabs scuttling across the mud. Mangroves play an important role in environmental conservation and as a resource for villagers and community life.

Advisable

- Comfortable, closed walking shoes and pants
- Please do not feed or touch the monkeys
